

SEALTITE PRO HFO: FIRST 1-HOUR FIRE RATING FOR METAL BUILDINGS

As a contractor, you know the challenges of insulating metal buildings—air and moisture infiltration, maintaining structural integrity, and meeting fire safety codes can be tough. That's where SealTite PRO HFO from Carlisle Spray Foam Insulation (CSFI) comes in. We're the first U.S. manufacturer to achieve a one-hour fire rating for spray foam insulation in a new metal building system.

A NEW STANDARD IN FIRE SAFETY

SealTite PRO HFO, with DC-315 Intumescent Coating from International Fireproof Technology Inc. (IFTI), meets ASTM E119 fire resistance standards. This makes it an ideal solution for addressing the fire safety challenges unique to metal buildings.

WHY SEALTITE PRO HFO?

Metal buildings are prone to air and moisture infiltration, making effective insulation essential. Traditionally, achieving a robust fire rating meant dealing with cumbersome and costly methods like installing 5/8" gypsum wallboard. SealTite PRO HFO changes that. It provides a direct application solution that maintains both structural integrity and compliance with stringent fire codes—no extra steps required.

BENEFITS YOU'LL APPRECIATE

- **Seamless and Airtight Barrier:** SealTite PRO HFO prevents air leakage and acts as a moisture barrier, protecting against corrosion.
- **High R-Values:** Ensures superior thermal resistance, keeping indoor temperatures comfortable for various applications—from warehouses and workshops to recreational buildings and cold storage.
- **Cost-Effective:** Reduces the need for extra framing and drywall, lowering overall building costs.
- **Simple Application:** Streamlines the construction process, reducing time and complexity.
- **Durable and Safe:** Enhances structural integrity and ensures compliance with fire codes, making buildings safer and more durable.

WHY MAKE THE SWITCH?

SealTite PRO HFO is a practical and efficient solution for metal building insulation. It's not just about meeting fire safety standards—it's about redefining what's possible in metal building construction. For more information on how SealTite PRO HFO can make your next project easier and more cost-effective, contact your Carlisle Spray Foam Insulation representative today.
